EXPERIENCE

General Motors

Lead Product Designer · Sponsored Project Jan–Apr 2026

- Led design from concept to prototype for a future EV interface across driver cluster, central display, and companion mobile app.
- Created IA for Oasis and Guardian modes, supporting driver rest, safety alerts, and emergency guidance.
- Presented final concept to GM stakeholders and incorporated feedback into the team's design direction.

Backyard Brains

UX Researcher & Designer · Client Project Jan–Apr 2026

- Led scenario-based research and concept validation for a multi-user EMG learning experience, identifying setup friction and classroom adoption constraints.
- Designed the mobile app at the connection layer between multiple hardware, supporting pairing, signal control, experiment guidance, and real-time learner feedback.
- Proposed a mobile-first connection model to replace the hardware connection, reducing hardware dependency and cost of development.

Sciencia AI

UX Designer Intern Jan–Mar 2026

- Conducted a UX audit of 4+ AI annotation platforms (Labelbox, CVAT, SuperAnnotate, SageMaker), comparing tasks creation, labeling, review and handoff flows.
- Identified gaps in onboarding, workflow visibility, error recovery, and reviewer efficiency to guide product design for AI data labeling users.

Pittsburgh Chinese Church Oakland

Visual Designer Aug 2021–Aug 2024

- Designed posters, announcements, and social media materials for 200+ event attendees across digital and print formats.
- Created visual assets for worship, youth programs, community events, and special campaigns to improve communication clarity and participation.

EDUCATION

University of Michigan

MS in Information
UX Research & Design
Aug 2024–Apr 2026
GPA: 3.9

University of Pittsburgh

BS in Computer Science
Minor: Japanese, Theatre Arts
Aug 2017–Aug 2021

SKILLS & TOOLS

Design:

Figma, UX research, UI/UX design, prototyping, interaction design, design systems, AR/VR design, illustration, branding, 3D-modeling

Programming:

Python, C, Java, JavaScript, HTML/CSS

AI / Product:

AI prototyping, LLM-assisted development, generative media, research synthesis, design-to-code

AWARDS

2025 +Tech Innovation Jam

Top 3 – HealthTech Track
